Subject: The online workshop of EUHT-5G RIT submission

Dear Chair,

As requested by WP 5D, Nufront has uploaded the documents which contain the changes between the EUHT-5G specification in 5D/222 (earlier version) and the one in 5D/979 (current version). The documents can be found at <https://extranet.itu.int/itu-r/imt2020-rev-after-2021-evalgroup/SitePages/Home.aspx>

For your information, there are two documents which include:

1. EUHT_5G_RIT_ALL_Changes_Track.docx

The two versions are compared and ALL the changes are marked in this document.

2. EUHT_5G_RIT_ALL_Changes_Track_Except_Format.docx

Based on the **EUHT_5G_RIT_ALL_Changes_Track.docx**, the changes of text format are removed to make the document easier to read.

To further explain the changes, Nufront would like to hold an online workshop next week. It will be highly appreciated if your IEG can attend the workshop to have more information about EUHT-5G RIT.

Is it OK if the workshop time is set to 16:00 ~ 18:00 (China Standard Time, UTC+8:00) on 18th March (Friday) since you may need some time to review the documents? If not, could you please tell us the convenient time for you?

About the meeting platform, does Microsoft Teams work for you?

Looking forward to your kind reply!

Best regards,
Bingxue.Chen
